A Lexile is a measure of text difficulty, based on two well-established predictors of how difficult a text is to comprehend: word frequency and sentence length. A Lexile measure does not address the subject matter or quality of the text, age-appropriateness of content, or the reader's interests. The Lexile measure is a good starting point in the book-selection process, with these other factors then being considered. Educators and parents should always preview books. For more information, visit [www.Lexile.com](http://www.Lexile.com).
